BREATHE BETTER ADVOCATE

PHARMACIST PLEDGE

I COMMIT TO:

1. Advocate for air pollution reduction in my community.

2. Raise awareness of the health risks of air pollution among patients, healthcare professionals, patient groups, and the public.

3. Engage in services which identify and reduce risk factors and focus on related health education and screening campaigns.

4. Undertake education and training on primary healthcare services provision to help mitigate the impact of air pollution on health.

5. Provide supportive services for people suffering from respiratory conditions.

6. Provide disease management and treatment optimization services for those already affected by air pollution, thereby improving health outcomes, disease control, overall respiratory health and well-being.

Supported by The Clean Breathing Institute, a scientific initiative funded by Colgate Consumer Healthcare.
